Abstract (en)

[origin: EP0864495A1] The tool includes a band support channel (12) for pushing forward a band for binding the object. The support channel is limited on one side by a tool body (2) and on the other side by a stepping conveyor arrangement for forcing a magazine stripe which contains the bands side by side to the band support channel. The stepping conveyor arrangement and the tool body can be easily separated from each other.
