Abstract (en)

[origin: EP0864674A2] The apparatus to produce or process a sliver, such as a drawing unit or a card, has two monitor rollers (6) with the sliver moving between them to measure the sliver thickness. At least one roller (6) is powered by a shaft which is divided into a drive shaft (15) and a roller shaft (16), linked together by a coupling (1) which allows axial displacement.
