Abstract (en)

The invention relates to a system (1) for dosing detergent to a washing process comprising: a washing device (2) wherein the washing process takes place; a supply holder (3) for the detergent; a mixing chamber (4) for mixing the detergent with a solvent in a predetermined concentration range; measuring means (14) for measuring the concentration in the mixing chamber; and control means for controlling the supply of at least a part of the content of the mixing chamber to the washing device, wherein the system is provided with a dose controlling unit (22) which is connected to the control means and to the washing device. <IMAGE>
