Abstract (en)
[origin: EP0864808A2] The fixture includes one-piece, springy, elastic fixture element having a locking arm and a holder arm in at least one opening in a light-housing. The fixture element is inserted with the holder arm into a first opening (5.1,5.2) in the light-housing, and with the locking arm into a second opening (5.2,5.3), then adjusted into a fixture position and locked. The openings are in the form of cruciform slits in the corners of the housing. The fixture element is in the form of an angled sprung strip with a U-shaped part. The locking arm, and a connecting bridge piece between the holder and locking arms are hook-shaped and protrude from the holder arm.
