Abstract (en)

[origin: DE19544685A1] The invention relates to novel amino acid derivatives of general formula (I), in which R, U, V, Y, n, m and R<1>-R<3> have the definitions shown in claim 1, and to their tautomers, diastomers, enantiomers, mixtures and salts, in particular their physiologically tolerable salts with inorganic or organic acids or bases, which have useful pharmacological properties, in particular selective NPY-antagonistic properties. Also disclosed are medicaments containing these compounds, their use and methods of producing them.
