Abstract (en)  
[origin: US6173653B1] Prefabricated kit for producing a station platform which is variable in its dimensions, in which platform slabs (1) are laid on foundations (4) with interposition of spacer elements (3). The spacer elements (3) can be replaced without damaging the other construction elements (1, 3, 4). The platform slabs (1) may be arranged in various horizontal positions above the foundations (4) in order to compensate for horizontal differences in size in relation to the axis of the track.
