Abstract (en)

[origin: WO9722236A1] It is disclosed a safety device for ensuring electronic equipment, e.g. computers, against theft, said device comprising two mainly parallel side surfaces or edge lists for said surfaces (1, 2) being connected to each other via a bottom or edge list for such a bottom (3), where the side surfaces (1, 2) at their upper edges comprise securing devices (4, 5) for the device to a surface, and where there between the edge lists or side surfaces (1, 2) of the device runs at least one lockable bar/barrier/door/plate (7). The device is preferably made of a metal or a metal alloy, e.g. steel.
