Abstract (en)  
[origin: EP0865744A1] Goods or objects are placed in a rotatable frame insert (1) inside the cupboard (3). Access to the insert is via a door in the opposite side of the cupboard to the corner in which it is fitted. Several drawers (2) for storing goods etc. are provided in the insert. Preferably the insert is constructed from a rotating plate having bearing journals (19) on the underside in the middle, which are mounted in the bottom of the cupboard. Rollers are also provided on the underside of the plate. Pairs of parallel pull-out rails (20,21) arranged in radially on the top side of the plate act as guides for the drawers.
