Abstract (en)
[origin: EP0865996A2] A packaging article comprises a bag 10 which is gas tight and inflated with gas. The bag 10 contains resilient pieces 12;20 of expanded polystyrene or shredded paper. The volume of pieces 12;20 may be less than three-quarters of the volume of the bag 10. The level of inflation and volume of pieces 12;20 is such that deformation of the bag 10 is resisted by the gas alone, the pieces 12;20 providing secondary protection. In another embodiment the pieces 12;20 may be omitted and the bag 10 may include a resilient sheet 18. <IMAGE>
