Abstract (en)
The start (6) and the second layer (9) of the replacement paper roll (1) are joined by several fixtures spaced apart in the longitudinal axial direction and made of material (15) solidifying at room temperature. The second layer of replacement paper is joined by several spaced, circular, triangular, star-shaped or oval drops of the solidifying material to part of the periphery of the replacement paper roll, at the same time as with the start (6) of the replacement paper roll. The solidifying material consists of hot-melt adhesive.

Abstract (de)
Bei einer Vorratspapierbahnrolle sind der Anfang und die zweite Lage der Bahn mittels Tropfen aus zügig erstarrendem Material verbunden.
