Abstract (en)

[origin: EP0866019A1] The arrangement (1) consists of a balustrade (5) with a handrail (6), a balustrade base, steps and/or plates (4) for the transport of persons and objects, a support body (7), and guide carriers with guides for the steps and/or plates and the handrail. At least one tensioning device (9) is provided in the arrangement, which enables a slim construction of the support body. The tensioning device comprises pulling devices which are connected with the support body and at least one support.
