Abstract (en)

The protection components (1) comprise stop pipes, which can slide into the coupling devices, crossing (2) them in an adjusted manner. The protection devices have a cylindrical profile and are arranged in accordance with a certain height by means of spacing components (10) provided for this purpose. The height corresponds to the impact of a tyre of a vehicle in collision. The impact is absorbed by the vehicle tyre when the protective device is hit by a standard vehicle. The spacing components (10) comprise on the one hand a set of feet supporting the coupling devices and on the other hand protection components adjusted to them and arranged at a distance from one another.

Abstract (fr)

Dispositif de protection pour un mur et la zone marginale de ce mur ainsi que pour une zone réservée, comprenant une disposition régulière d'éléments de protection (1), les éléments de protection (1) étant reliés les uns aux autres au moyen d'éléments d'accouplement (2), remarquable en ce que lesdits éléments de protection (1) sont constitués par des tuyaux butoirs, qui peuvent être glissés dans les éléments d'accouplement et les traverser (2) de manière ajustée. <IMAGE>
