Abstract (en)
[origin: EP0866198A1] Lock (1) for the door of a vehicle, in which an internal control lever (33) which can be actuated by means of an internal handle of the door is adapted to disconnect the safety mechanism and to actuate a stop (8) of the lock (1) by means of a transmission lever (15), the internal control lever (33) is provided with a shaped portion (38b) adapted to interact with the transmission lever (15) in order to prevent the said lever from being displaced into a position allowing for opening during a first actuation of the handle, in such a manner that the lock (1) can be opened by means of a second actuation of the said handle. <IMAGE>
