Abstract (en)  
[origin: EP0867137A2] The shelving board has a base section (3) with a projecting front or back wall (5) attached to the front edge of the board and extending outwardly from the plane of the board at an angle. At least one flange (8,9) projects from a side edge of the base and along a side edge of the wall. The flange projects at an angle to the base. There can be a stiffening rib (10,11) on the same side of the base as the flange, which extends over most of the base but leaves a small gap (d) next to the flange. The second edge of the panel can have a recess (12). The flange is lower than the sidewall of the base.
