Abstract (en)
The cistern has a reservoir (2) in which a tappet actuated valve mechanism (15,16,20) is sensitive to the movement of a press panel (11). This moves in an aperture (5a) formed in the upper face of the reservoir. A further opening (5b) is formed in the face of the reservoir. The actuating mechanism is mounted in one of the two openings. The openings can be formed by parts of the same cut out (5).

Abstract (fr)
Cuve (2) de réservoir de chasse dont le mécanisme d'actionnement du mécanisme de chasse peut être commandé par un organe (11) de manoeuvre se trouvant sur le dessus de la cuve ou sur le côté de la cuve. <IMAGE>
