Abstract (en)

[origin: EP0867585A2] Hinge, sealing and/or clamping profile includes a profile part (1) with a recess (2) on one side to receive a planar part. On the other side are at least two sealing ribs (4). The centre lines (6,7) of the ribs form an angle differing from zero. Preferably the ribs are approximately triangular in cross section and have equally long sides, between which the rib is semicircular. The ribs may be attached removably on the profile part by dovetail grooves. The profile part preferably has an aperture which is circular in cross section to receive a metal rod.
