Abstract (en)

[origin: US6056985A] PCT No. PCT/CH96/00435 Sec. 371 Date May 18, 1998 Sec. 102(e) Date May 18, 1998 PCT Filed Dec. 12, 1996 PCT Pub. No. WO97/22537 PCT Pub. Date Jun. 26, 1997To find the core temperature of the foodstuff, the package can be fitted with an aperture (3) through which a temperature sensor (11) is inserted into the foodstuff. The temperature sensor is connected to a temperature detection instrument at an end projecting from the aperture (3) and the foodstuff heated to the predetermined temperature, the temperature curve being stored in the temperature detection instrument so as to be fetched. For cooling, the foodstuff with the sensor is, for example, taken out of the oven and reconnected to the temperature detector, in which the temperature curve during cooling is stored so as to be fetched.
