Abstract (en)

[origin: EP0868875A2] One side of the support material (2) is self-adhesive and incorporates ink (5) which, when the other side of the marker element (1) is pressed against an object, produces a mark. The ink is in the form of an ink drop on the side of the support material facing away from the adhesive layer (3). The ink is formed of a coating on a substrate such as paper, tissue or non-woven material. The ink is covered by a thin protective foil (6).
