Abstract (en)
[origin: EP0869219A2] The path consists of supports (50) carrying a number of parallel boards (10), at right angles to the supports. Both supports and boards are manufactured from extruded recycled mixed plastics, and are cut to size. Boards and supports are positively connected at right angles to the supports. Each board consists of a cover panel with vertically projecting rails along the long edges. Each panel has a covering layer, which consists of a coarse granular material and/or ribbing, and is of a different colour from the panel.
