Abstract (en)
A microwave oven having an electric connector (100) for conveying current to a fan motor (44) and a tray drive motor. The electric connector including a plurality of male terminals (111, 112 and 113) coupled on the fan motor; a plurality of female terminals (141, 142 and 143) for coupling on the male terminal; a plurality of terminal housings (131 and 132) for receiving the female terminal; and a device for guiding an inserting position of at least one of the female terminals into at least one of the male terminals. The device includes a position guide projection (135) extending from a side of one of the terminal housing, the position guide projection being formed extending over one side end of the fan motor. <IMAGE>
