Abstract (en)

[origin: EP0599200A2] The solid state image sensor of the invention comprises a plurality of photosensitive elements arranged in a matrix form, a vertical shift register disposed adjacent each column of the photosensitive elements and adapted to vertically transfer signal charges read from the corresponding photosensitive elements, a storage region for storing signal charges transferred by the vertical shift register and a horizontal shift register adapted to horizontally transfer signal charges read from the storage region, the above vertical shift register comprising units of  $2n$  ( $n$  is a positive integer of not less than 3) transfer electrodes which are respectively independent. <IMAGE>
