Abstract (en)

The base (2) of the ceramic, especially china or stoneware, dish has a higher, flatter part (2a), roughly 15 millimetres deep, next to a deeper, trough-shaped part (2b). roughly 40 millimetres deep. The average depth of the deeper, trough-shaped part is at least twice as much as the average depth of the higher, flatter part. The surface of the deeper part is about 15 to 50 %, or 25 to 35 %, of the total surface of the bottom of the dish. The wall thickness (d1) of the dish in the higher part of the bottom is less than the wall thickness (d2) of the deeper part.

Abstract (de)

Schale zur Aufnahme von Nahrungsmitteln, insbesondere Suppenschale, wobei der Schalenboden (2) einen höherliegenden, flacheren Bereich (2a) und daran anschließend einen tieferliegenden, muldenartigen Bereich (2b) aufweist. Erfindungsgemäß ist gemessen vom Schalenrand (3) die durchschnittliche Tiefe des tieferliegenden, muldenartigen Bereiches (2b) des Schalenbodens (2) mindestens doppelt so groß wie die durchschnittliche Tiefe des höherliegenden, flacheren Bereiches (2a) <IMAGE>
