Abstract (en)  
The inner surface (2) of the plate is tilted at an angle of between 2 and 12, preferably between 5 and 8, degrees, to the plane (10) on which the plate (1) stands. At least the deeper part (2b) of the plate's inner surface has a raised outer rim (3). The outer rim ends at a constant height in relation to the plate's stand-surface. The underside (9) of the plate has a ridge (8). When two plates are turned by 180 degrees and stacked on top of each other, the ridge of the upper plate stands in the inner surface of the lower plate.

Abstract (de)  
Teller mit einer durchgehend ebenen Tellerinnenfläche, wobei die Tellerinnenfläche (2) gegenüber der Auflageebene (10) des Tellers (1) um einen Winkel ( $\alpha$ ) geneigt ist und zumindest im tieferliegenden Bereich (2b) der Tellerinnenfläche (2) ein hochgezogener Außenrand (3) vorgesehen ist.
