Abstract (en)  
[origin: EP0870460A2] A shower cabinet (10) comprises a lower tray (11), side walls (13) made of plastic material and lateral closing glass doors (14) connected to said walls (13). At least one side chosen between the side walls (13) and the tray (11) comprising, enbloc, seats for housing the edges of the glass doors (14). For example, the side walls (13) may comprise seats, made in one piece therein, for directly housing the glass doors (14). In a shower tray (11) and in an upper element (15) joining the side walls (12, 16), respective housings (18, 19, 20) may be provided for the side walls (13) and for guide elements (21) for guiding the sliding movement of a sliding portion (16) of the side walls (13). Advantageously, the shower tray (11) and upper connecting element (15) are made of injection moulded plastic. <IMAGE>
