Abstract (en)

[origin: EP0870960A2] The coupling system for dosing valves, in a multi-component dosing assembly, has a closing body (AK) of a dosing valve (DVx) at each coupling counter piece (2). In the uncoupled setting (P0), the coupling piece (3) is moved by a slide along a rail (5) with the dosing valves to a given dosing valve (DVx) to be operated. In the coupled position, the coupling piece (3) and the counter piece (2) form a control valve for the dosing valve (DVx) to be used.
