Abstract (en)

[origin: EP0871154A2] An adhesive mounting system (2) comprises multiple composite layers (5-7), wherein each composite layer comprises a substrate (7) having a back side coated with a removable adhesive (5) and a front side coated with a releasing agent (6). The composite layers are arranged such that the removable adhesive (5) of one composite layer is in contact with the releasing agent (6) of another composite layer. The adhesive mounting system (2) allows objects (3) provided therewith to be removably mounted on a support, for easy relocation. Display items (3) comprising the adhesive mounting system (2) and methods for making the adhesive mounting system (2) are disclosed. <IMAGE>
