Abstract (en)
[origin: EP0871246A2] The line terminal block (1) with three series terminals (2, 7, 8). The block with three AC circuits without a neutral conductor, consists of two series terminals and two AC circuits. One terminal is provided as the floor terminal for the connection of the conductors (11-L2), the second terminal for the connection of the conductors (L3-PE) and the third terminal for the connection of the neutral conductor. The terminal for the neutral conductor is arranged between the floor terminal for the conductors (L1-L2) and the terminals for the conductor (L3-PE). The conductor connections are designed as tension spring connections. A protection unit (14) is provided.
