Abstract (en)
[origin: WO9808018A1] The invention concerns a siphon system, comprising a siphon, a plug (12) co-operating with the outlet of an apparatus, and an intermediate piece (5) for connecting the siphon to the plug (12) or an adapter, the siphon comprising an upper connecting portion with the intermediate piece (5). It is characterised in that: the plug (12) or adapter bears in a groove (10), a ring seal (11) ensuring tightness, when it is being is connected by nesting, with the intermediate piece (5); the intermediate piece (5) bears externally in its upper portion a sliding piece (6) co-operating with a spring (7); and the intermediate piece (5) bears internally built-in clips (8) for fixing and securing when the lower portion of the plug (12) or adapter is nested downwards into the intermediate piece (5), by means of the spring (7).
