Abstract (en)
[origin: WO9631863A1] A roadsign illumination kit including a frame (14) which is fixed to the periphery of a roadsign (12) and includes at least one light emitting device (15) having a pair of connection terminals. An energy source (19) for the at least one light emitting device (15) is connected to the rear surface of the roadsign (12). The frame (14) is connected to the roadsign (12) with a dual-sided adhesive tape.
