Abstract (en)

[origin: EP0872426A1] The cardboard packaging for several bottles comprises a polygonal bottom (1) and side walls (2,3,4), two of which are fixed to the bottom. An upper part forms a cover (6) fixed to one of the side walls. Two walls (2,3), parallel to the bottle axes, are joined to the bottom by folding lines. The other side walls are not fixed to the bottom. The bottom is divided into two equal parts by a folding line (10), parallel to the walls, which joins the opposite tops of the polygon. The wall (2) adjoins two walls (4) which are divided into equal parts (4a,4b) by a folding line (11) perpendicular to the bottom. One of the walls (2) has an opening (13) enabling the bottles to be seen.
