Abstract (en)
[origin: EP0872817A1] The hazard warning unit (1) has a housing (2,3) containing at least one sensor for a hazard parameter, evaluation electronics for the sensor signal and a light source (7,8) for alarm indication. The unit has a communications interface with a transmitter for wireless transmission of data acquired by the unit. The unit can be switched over into a data transfer mode in which the warning data are transmitted. The transmitter for the communications interface can be the alarm indication light source or an additional infrared light source.
