Abstract (en)
[origin: WO9721368A1] The present invention is for a paint applicator, brush or similar painting tool, the handle (2) of which can easily be set between two different positions during ongoing work. Shaft and bristle parts of a paint-brush according to the invention have been divided along a plane which somewhat deviates from a plane which is parallel to an imaginary axis along the paint-brush parallel to the bristles. The two parts of the brush are joined by a shaft or the like which is at right angle to the dividing plane.
