Abstract (en)
[origin: WO9724975A1] An inflatable vaginal speculum (10) comprising an inflatable elongate member (12), the elongate member (12) being adapted for insertion into the vagina when uninflated, the inflation of the elongate member creating a passage (18) through the member (12) which resists occlusion due to the force applied to the member by the vaginal walls. There is further provided a means for inflating the speculum.
