Abstract (en)

[origin: EP0873699A2] The cleaning device has a holder for a cleaning brush and a coupling part for connecting with the drive shaft of a drive motor in the handle. The holder (8) has both inner bristles (12) and external bristles (21). The inner bristles are provided on a support (1) set on the base (9) of the holder. The inner bristles pref. extend over the entire axial height of the holder. The outer bristles are provided on a preferably cylindrical wall (10) of the holder and project radially inwards from the wall. The outer bristles are provided on at least one and pref. four support strips (17 to 20) which are spaced behind each other in the circumferential direction of the holder.
