Abstract (en)

[origin: EP0874087A2] Disclosed are docks for ports, of the type which comprise multiple elements (1) in the form of floating concrete caissons connected to one another, characterized by the arrangement, at the lateral edges of each of the elements (1) constituting the dock, of individual incorporated galleries (8,81) which pass along the dock and which carry the pipes, tubes, and conductors (9,9',10,10',11,11') for the various services for the mooring points, the interior of the galleries (8,8') being accessible at any point in their length for the incorporation, at the desired point, of vertical posts (15,16,17) connected rigidly to the dock and carrying the connections for servicing the various mooring points. <IMAGE>
