Abstract (en)
[origin: EP0874201A2] One or other of the two heating circuits are switched on by a switch (10). A dirt-separator (8) and air-separator (9) are housed in the same vertical housing positioned crosswise to the axis of the impeller wheel. A suction pipe (26) leading to the heating circuit for room-heating is attached to the side of the dirt-separator. The suction pipe (19) leading to the heating circuit for hot water preparation near the switch is attached to the housing. A pressure pipe (14) is attached to the side of the circulating pump unit (5,6).
