Abstract (en)

[origin: WO9801606A1] The invention concerns a wet spinning device with a main line (1), which is connected via a supply line (2) to a reservoir (3), and with at least one spinning arrangement (4) which comprises a spinneret opening into a spinning tube (7) which is connected via a delivery line (5) to the main line (1) and comprises an outlet (8). The main line (1) comprises at least one pressure sensor (9) and the supply line (2) comprises a control valve (12). The pressure sensor (9) and the control valve (12) are connected to an evaluating device (10). The control valve (12) is actuated by a signal from the evaluating device (10) as a function of the measured pressure.
