Abstract (en)
[origin: GB2314062A] A coin dispensing apparatus comprises a magazine (25) for storing rolls of coin (1), a lifting conveyor (2) having a plurality of hods (3) which are driven by the lifting conveyor (2) and interact with the outlet of the magazine (25) to receive coin rolls (1) therefrom. A transporting conveyor (13) has a plurality of hods (14) which are driven by the transporting conveyor (13) and which interact with the hods (3) of the lifting conveyor (2) for transfer of rolls of coin (1) from the lifting conveyor (2) to the transporting conveyor (13). A dispensing outlet cooperates with the hods (14) of the transporting conveyor (13) to receive rolls of coin (1) transported thereby. Preferably, the conveyors are controlled by individual electric motors 7, 18 operated by a computer. Preferably the coin dispenser forms part of a bank note dispensing machine, the coin deliverer being the bottom part to avoid lifting the magazine to heights during filling.
