Abstract (en)

[origin: WO9726777A1] A microwave application device, particularly for baking products on a metal carrier, is disclosed. The microwave application device, particularly for baking products on a metal carrier, includes at least one microwave generator (G) and a metal waveguide, in particular one having a rectangular cross section (1, 11, 11', 11", 11""), characterised in that said waveguide defines a baking chamber with a floor consisting of a removable flat metal carrier (5, T) on which the products to be baked (6) are placed. Said device is particularly useful for baking food products.
