Abstract (en)
[origin: DE19646861C1] Disclosed is a device for operating a gas discharge lamp (16), comprising a DC/DC converter (10) which converts an input voltage (11) corresponding to the standard voltage into two output voltages differing from said standard voltage (12). The gas discharge lamp (16) is connected through an activating circuit (15) to those output voltage of different values.
