Abstract (en)
The pallet is comprised of a board (2), releasably mounted on a frame (1), having appropriate dimensions so as to be received appropriately in the areas or spaces of transport trucks or ship holds. The board (2) has pairs of openings (7 and 8), the first openings being longitudinally oriented for the positioning of the rear wheel of the motorcycles, whereas the second openings are obliquely oriented for the positioning of the front wheel, providing for sufficient stability without requiring additional holding elements. The openings (7 and 8) have a beveled edge (9) at its extreme zones in order to avoid damaging the wheels. The pallet is intended to transport motorcycles in trucks and/or ships, and to maintain said motorcycles stored in stable conditions and occupying a minimum space. <IMAGE>
