Abstract (en)

[origin: EP0875628A1] A revetment which is improved in workability while natural stones are used. A plurality of natural stone holding units (a) are laid on a slope (14a) to be reveted, leaving no space between them. In each natural stone holding unit (a), a plurality of natural stones (5) are bonded to a wire net (3) with adhesive, and a frame body (2) is provided on the entire peripheral portion of the wire net (3). The natural stone holding units (a) are connected to one another through the frame bodies (2) of adjacent natural stone holding units (a) to reinforcing the fixing of the plurality of natural stone holding units (a) to the slope (14a). <IMAGE>
