Abstract (en)

[origin: EP0875777A2] The cable collar is provided by a flat collar with a circular channel communicating with tangential cable guides for entry of the optical fibre cable ends received in the circular channel. The latter is enclosed by a cover provided with seals. The flat collar can be provided by a disc with the circular channel formed in its surface, or by a circular ring forming the sides of the channel and is made of a corrosion-resistant material, e.g. metal, plastics, or glass-fibre reinforced plastics.
