Abstract (en)
A time-keeper has two discs 5 and 6 at least partly visible from the front of the time-keeper. The discs are urged to rotate by the time-keeper drive mechanism in casing 10 such that each disc rotates in the same direction and angular velocity as time-keeper hand 2. Time-keeper hand 2 is a conventional clock and/or watch hand such as hour hand, minute hand or second hand. <IMAGE>
