Abstract (en)
[origin: WO9702771A1] The present invention refers to a system in the form of standards (1) and at these affixable carriers for shelves or the like, in which the respective standard (1) shows one along the standard running groove (2), the opposite sides of which (3) are placed in planes parallel with each other. The new and special with this invention is that the beforementioned sides (3) are provided with, as seen in the lengthwise of the standard, at a distance of each other arranged and from the outsides of the standard invisible slits (4) of limited length placed in pairs opposite each other in the groove (2) and that a carrier device (7), whose length is greater than the width of the groove and the height of which is less than the length of the slit, is arranged to facilitate the inserting in the groove (and be turned at the slits) to one across the groove (2) existing, in relation to the cross direction of the standard (1) mainly fixed position.
