Abstract (en)
[origin: WO9725250A1] A lightweight pallet made of a thermoplastic material, having a deck and integrated sheet legs underneath the deck along its longitudinal, transverse, or both sides. The pallet being fabricated by thermoforming an extruded plastic parison having a monolayer or multilayer structure into one predominantly flat article and bringing the side parts of the article into a position perpendicular to the pallet deck and affixing the sheet legs in that position. The pallet may further be provided with appropriately designed runners.
