Abstract (en)

A prescription sheet, made e.g. from paper suitable for laser printing, incorporates a sign, word or message which allows its authenticity to be verified by the pharmacist. The sign or message is invisible in normal circumstances, and is revealed e.g. by rubbing a specific area, enclosed by a frame (2), with a metal object. The message can be, for example, the words 'original document'. The sheet can also incorporate a symbol (3) printed in a colour which is difficult to photocopy.

Abstract (fr)

Cette feuille contient un message invisible d'authentification qui peut être révélé, notamment par frottement (2). Application dans le domaine médical. <IMAGE>
