Abstract (en)
[origin: EP0877215A2] The built-in cooling unit, refrigerator or freezer, has a heat-insulated casing with a door fitted to it having an adjustable front board on it to match it to the fitted kitchen, held by fittings, of which at least the one on the upper horizontal door sector is cut at an angle. The angle arm facing the door lies on a plane in which there are spaced height adjustment screws for the front board. The angled arm (17) has a recess (19) in it which is open towards its free end, for bringing in the height adjustment screw (25). It has at least one projection (22) to act positively with the resting plane (26).
