Abstract (en)

[origin: EP0877351A2] The invention concerns a hooking device for windable boards, particularly for information displayers with interchangeable boards comprising in combination a sheath (5) having an elongated shaped, providing a longitudinal pocket (6) and two divided longitudinal surfaces (9), longitudinally coupled to said pocket (6) and superimposable at one end of the windable board (1; 10), a rod-like element (7), having such dimensions to be introduced within said pocket (6) and having the ends projecting from the same pocket (6), and a pair of flexible and elastic straps (8), which respectively couple at one end of the respective end of the rod-like element (7) projecting from said pocket (6) and at the other end with the wounding roll (2) of the windable board (1; 10). <IMAGE>
