Abstract (en)
[origin: WO9728018A1] A vehicle safety system for restricting the movement of a vehicle occupant's head relative to the vehicle in cases of extreme acceleration or retardation as a result of a collision or similar, comprising a net (12) or similar which on release can rapidly be deployed in front of the vehicle occupant's head, wherein the device is in the form of a headrest, the net (12) is stowed in a net compartment (27) in the headrest and the net can be drawn out of the net compartment (27) and to a position forward of the vehicle occupant's head by arms (3, 4) which can be swivelled out of the device by means of a pretensioned elastic body (25).
